

Glacier

If you live in a hard water area, you'll be more than familiar with the unsightly and damaging effects of limescale. The drudgery of constant cleaning and the on-going battle with hard water is one you're never going to win. The Glacier water softener removes the minerals in your water that cause limescale, preventing the build-up in your home. Prevention is better than a cure.

The Glacier water softener is an extremely popular compact and reliable water softener, which can be adjusted to the exact water hardness levels in your local area. This makes it efficient, saves you money and stops limescale for good.
